

Lakeside Launch - Navigating your new journey through Archer's NGRX

Jonathan Broz

Legal Disclaimer

The statements in this presentation include "forward-looking" statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements include but are not limited to: market opportunities and growth rates; our strategies, investments and product plans; anticipated future financial performance; and other predictions. These statements are based on estimates and information available to us at the time of this presentation and are not guarantees of future performance. They involve risks and uncertainties that could cause our actual results to differ materially, including but not limited to the unpredictable nature of our rapidly evolving market and periodic fluctuations in our business; the effects of competition; and any adverse changes in our channel relationships or relationships with customers.

Readers are cautioned not to place undue reliance on our forward-looking statements, which speak only as of the date such statements are made. We do not undertake any obligation to update any forward-looking statement to reflect events, circumstance or new information after this presentation or to reflect the occurrence of unanticipated events.

Who am I?

Jon Broz

- Senior Pre-Sales Engineer
- 20 years IT Operations and security
- 5 years with Archer
- Based in Sydney, Australia

Purpose

- Become familiar with the New UI
- Hands-on experience with the new change
- Generate NGRX enthusiasm with Archer end users and Admins

The New User Experience

User Centric Design

Designed with you,
our clients

Intuitive

Navigate and perform
your tasks efficiently
without any training

Responsive

Usable on any screen
size or device

Accessible

Accessible anywhere,
by anyone

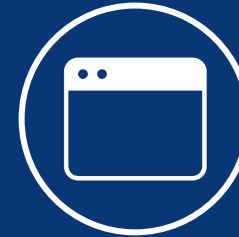

Easy to Adopt

Simple and quick to adopt
with minimal effort.

Open Discoverable APIs

Open API standard
enables easy
integrations

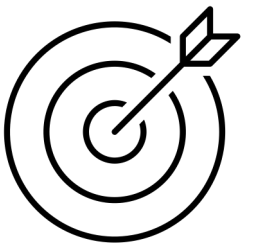

Optimized for Modern Browsers

Compatible with most-
used browser functions

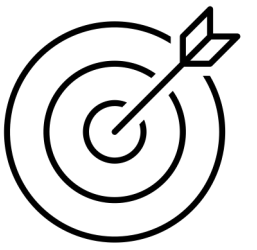

Scalable, Resilient, and Agile

Microservice-powered UI
provides best
performance

NGRX Enhancements

	Classic	NGRX	New in NGRX
Navigation			Breadcrumbs, Integrated Browser controls: Back & Forward and open records in the same tab, new tab or new window, Bookmark Page URLs, Guided tour
User Interaction			Independent field edit on Record page, Smart Copy, Single-click download of multiple files.
Content Segregation			Separation from business-critical content via Change Log, Access Log, and AWF Progress panels, Attention panel for quick error management
Record Page			Clean header, consolidated actions in top right corner for easy access, dynamic content display in 1-4 columns, dynamic Save and Cancel actions
Overall User Experience			Modern service-based architecture & MUI design patterns, intuitive, responsive, supports mobile devices, minimizes user efforts
Field Validation			Improved visualization of required field and field requiring user attention, Alert indicator on Sections and Tabs containing field with validation error
Field Enhancements			Dynamic field height, Dynamic filtering on values list, UG, and RP fields, User Avatars, RO/Calculated indicators, File type icons for attachment

NGRX Enhancements

	Classic	NGRX	New in NGRX
Custom Object			New, robust and secure approach to manage record page display, API based content Metadata and content management
Layout Objects			Progress Tracker, Report Objects: Chart/Statistical data toggle, and Report drill down, Scroll on Tab sets
Admin Configurability			Hide Section Header, Hide Copy/New Actions on Record Page, Responsive Layout configuration per section
Search			All-in-one screen – Build Query, Preview Results, and configure/save report without losing context, Better view of related application fields, Custom field labels
Search Result			Quick Filters on Charts and Tabular reports, Visualization of Chart Reports, WISIWYG Export for Chats, In-line editing
Integration			New REST APIs using OpenAPI specification standard, Swagger UI for interactive API docs

Roadmap -

Now

- Network Graph
- Mapbox
- Supporting sorting on CR Grids
- Relationship Visualization

Next

- Dashboard Filters
- Email using templates
- Attachment Download History
- Recall Engage on NGRX
- Comments

FUTURE

- DDEs on Inline Edit
- Inline Edit on Report Object
- AWF Electronic Signature
- DDE/Event Analyzer
- Bulk Publish to Engage
- Calendar
- Sparkline
- Field Types:
 - Matrix
 - CAST
